GUIDE TO THIS BOOK

PROGRAM BOOK, NEW RESEARCH BOOK, EXHIBITS GUIDE

This book contains the Program Book, New Research Program Book, and Exhibits Guide. Located within the Program Book you will find a topic index in addition to program tracks (color-coded) that will assist you in finding scientific sessions of interest. The individual program for each day of the meeting is also color-coded so that you can easily find the day(s) of the meeting that interest you. The program is listed by start time with the formats listed alphabetically under those times. To make it even easier to plan your day a separate Days-at-a-Glance has been included with your registration materials. The New Research Program Book lists the titles of the Posters that will be presented at this meeting, organized numerically by session/day. There is a topic index for the Posters only at the end of the New Research Program Book. The Exhibits Guide contains a list of the exhibitors and a floor plan of the exhibit hall, along with information about the Product Theaters.

If you have any questions about this book or the scientific program, please feel free to stop by the Scientific Programs Office, Room 307B, Level 3, Pennsylvania Convention Center and an APA staff person will be happy to assist you. All central office APA staff will be wearing green badges.

Pursuing Wellness Through Recovery and Integration

Save the date now to attend the American Psychiatric Association’s 64th Institute on Psychiatric Services, APA’s leading educational conference on clinical issues and community mental health to meet the service needs of people with severe mental illness.

This four-day event will feature more than 100 expertly-led educational sessions on a variety of topics, popular networking events, and exhibits that complement the educational program. Further information can be found on the Web at www.psych.org/IPS.

Who Should Attend?
- All APA members, including early career psychiatrists and psychiatric residents (advance registration begins June 4)
- International psychiatrists
- Primary Care Physicians
- Mental health professionals from all disciplines

Why Should You Attend?
- To earn CME credit (CEs have also been applied for)
- To improve patient care
- To learn about clinically-focused topics that offer specific skill sets
- To network with colleagues and obtain solutions for the challenges you face
- Because your return on investment will reap both personal and professional rewards

The IPS Has Gone “GREEN”

The Preliminary Program, which will include registration, housing, travel, and detailed program information, will be available later this Spring, online only, at www.psych.org/IPS.

The American Psychiatric Association is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

American Psychiatric Association
Dear Colleagues and Guests:

Welcome to the 165th Annual Meeting of the American Psychiatric Association in historic Philadelphia, the “City of Brotherly Love.”

The meeting offers hundreds of sessions to learn the latest science, clinical advances, and promising practices from among the best in the field, as well as numerous networking and social opportunities. The meeting also includes more than 50 courses and 5 master courses on such topics as practical cognitive behavior therapy, essential psychopharmacology, and child psychopharmacology.

The Opening Session on Sunday, May 6 will feature a unique event with two masters of psychotherapy, Aaron T. Beck, M.D. and Glen O. Gabbard, M.D., who will discuss in conversational format the commonalities and differences between cognitive therapy and psychodynamic therapy. Another highlight is the Convocation of Fellows, which will be on Monday evening. We are honored to have as the speaker Edward Kennedy, Jr., president of Marwood Group & Co., a healthcare-focused financial services firm. Mr. Kennedy is also an active advocate for the needs of persons with disabilities.

The theme of this year’s meeting is Integrated Care — psychiatrists working collaboratively with primary care physicians and other health care professionals to coordinate quality patient care. Numerous sessions will be addressing integrated care issues, including a Presidential Symposium on New Approaches to Integration of Mental Health and Medical Health Services chaired by Wayne J. Katon, M.D., and Jurgen Unutzer, M.D., M.P.H.; a symposium on Integrated Psychiatry Primary Care Services chaired by Britta Ostermeyer, M.D.; and a workshop on Integrating Psychiatric and General Medical Care: Military and Civilian Models, chaired by Sheila Hafter-Gray, M.D.

We are delighted to partner once again with the National Institute on Alcohol Abuse and Alcoholism (NIAAA) to highlight advances in treating co-occurring disorders, the use of technology and medication, and integrating treatment in primary and psychiatric care. The NIAAA Plenary Lecture will be presented by Bankole Johnson, DSc., M.D., Ph.D., MPhil., Chair, Department of Psychiatry and Neurobehavioral Sciences at the University of Virginia. John Krystal, M.D., Chair, Department of Psychiatry at Yale-New Haven Hospital and Director, NIAAA Center for the Translational Neuroscience of Alcoholism, will deliver a Frontiers of Science Lecture as part of the NIAAA track.

Other special tracks include the DSM-5, Ethics, and the military. Look for symbols throughout the Program Book to help you find sessions in a variety of topical tracks that may relate to your interests.

Special guest lecturers include Kay Redfield Jamison, Ph.D., psychiatry professor at Johns Hopkins Medicine and author of An Unquiet Mind; and Sherwin B. Nuland, M.D., author of several books including The Art of Aging: A Doctor’s Prescription for Well-Being.

FocusLive, Advances in Medicine, and Advances in Research all return by popular demand. The always popular MindGames, APA’s national Jeopardy-like competition for residents, will take place on Tuesday at 6:30 in the evening to allow more people an opportunity to attend.

Many thanks go out to the Scientific Program Committee for its outstanding work under the leadership of chair Kenneth R. Silk, M.D., and vice chair Michael F. Myers, M.D. and to the APA staff members who have worked so persistently to develop an outstanding program at the 2012 Annual Meeting.

Exceptional educational and networking opportunities await you at our 165th Annual APA meeting. Have a wonderful, enlightening week!

Sincerely,

John M. Oldham, M.D.
Dear APA Members and Guests:

Welcome to Philadelphia and to the 165th Annual Meeting of the American Psychiatric Association. It’s hard to believe that a full decade has gone by since our last meeting in Philadelphia. This historic city, known as the birthplace of this nation, the first capital of the United States was also the birthplace of the APA (then known as The Association of Medical Superintendents of American Institutions for the Insane). This is a true homecoming for the APA, and Philly’s vibrant and culturally diverse environment provides a wonderful setting for the scientific presentations we have planned.

As always, APA members will not want to miss two activities on Sunday: the Business Meeting (12:30 p.m.–1:30 p.m.) and the Opening Session (4:30 p.m.–6:45 p.m.). We are instituting a new structure to the Opening Session. Not only will it contain the formalities of Opening Sessions of the past, but this year it will also contain “Cognitive Therapy and Psychodynamic Therapy: More Alike than Different? – A Conversation Between Aaron Beck and Glen Gabbard,” moderated by our President, John Oldham. Please also make sure to attend the Convocation of Distinguished Fellows on Monday beginning at 5:30 p.m., which recognizes newly inducted fellows and distinguished fellows and honors this year’s award recipients. Ted Kennedy, Jr., will deliver the convocation address.

This year the Scientific Program Committee (SPC) collaborated with APA President, Dr. John Oldham, to plan an exciting and eventful program reflecting his theme, Integrated Care. Once again, several subspecialty societies, other allied psychiatric organizations, APA components, and the National Institute on Alcohol Abuse and Alcoholism, will present on the latest developments and best practices in their areas. We also are fortunate to partner with the Philadelphia-based Scattergood Foundation. The Foundation has a number of initiatives related to psychiatric, mental, and behavioral healthcare ethics that have been organized throughout the meeting into a track. Hopefully, this is the beginning of a strong and ongoing relationship between The Scattergood Foundation and the APA.

The Scientific Program Committee selected sessions covering a broad spectrum of approaches to teaching and learning: symposia, workshops and other small interactive sessions (such as Meet the Authors), lectures, case conferences, medical updates and forums. This year we are continuing and expanding the recently piloted seminar format which offers an extended (4- or 6-hour) learning experience to cover topics in a more interactive style than the traditional symposium and in greater depth than a workshop. Also back are the “Night at the Movies” evening media workshops (7 p.m.–10 p.m.) which offer thoughtfully selected films accompanied by stimulating analyses and discussions. All are part of the CME Scientific Program and are open to all registrants at no additional fee.

For the second year, we are pleased to recognize the work of psychiatry residents in the Resident Poster Competition sponsored by the APA Division of Education. The editors of the journal Academic Psychiatry will select the winning posters in each of four categories: Community Service; Curriculum Development and Educational; Patient-Oriented & Epidemiology; and Psychosocial and/or Biomedical Research. These posters will be presented in two sessions on Saturday. Note also that the New Research poster sessions on Sunday will be devoted to the work of Young Investigators as well.

We encourage all attendees to either fill out an evaluation here or to do so online following the meeting as you reflect on your experiences. Your feedback on the relevance and quality of this year’s program to your practice needs as well as your insights into gaps in knowledge and clinical practice are taken seriously. They are carefully reviewed by the Scientific Program Committee and are essential in helping us meet your needs as we plan future meetings.

Once again, welcome to Philadelphia. We are delighted to have the privilege of sharing with you the best that our field has to offer. I have appreciated the wonderful opportunity to work with the fine and hard-working members of the Scientific Program Committee and the APA Staff who never said “no” and repeatedly tried to make everything that the committee deemed important come to realization in this meeting.

Enjoy!

Sincerely,

Kenneth R. Silk

Continuing Medical Education
Educational Objectives
At the conclusion of this meeting the participant will be able to:
1. Review new research findings in the fields of psychiatry and neuroscience and address gaps in knowledge;
2. Acquire new knowledge and skills in clinical psychiatry, which can be utilized to improve patient care;
3. Identify and remove barriers to the transfer of new knowledge for your practice, including provision of culturally competent care for diverse populations;
4. Assess a variety of treatment choices, including psychotherapeutic and pharmacological options; and
5. Recognize mental health service delivery issues, including barriers to care.

The APA is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The APA designates this live activity for a maximum of 50 AMA PRA Category 1 Credits™. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Please note: Formats on the scientific program, as outlined below, have been approved for CME credit.

The scientific sessions on the official Annual Meeting program, with some exceptions, meet the criteria for AMA PRA Category 1 Credit™. Sessions in the following program formats are designated as category 1: Advances in…; Series; Case Conferences; CME Courses; Focus Live; Forums; Lectures; Master Courses; Presidential Symposia; Scientific and Clinical Reports; Seminars; Small Interactive Sessions; Symposia; and Workshops.

New Research Poster Sessions are NOT designated for AMA PRA Category 1 Credit™. Located in Exhibit Hall C, Level 2, Pennsylvania Convention Center.

Scientific sessions are open to all Annual Meeting registrants with the exception of Case Conferences, which are open to APA members only. CME Courses and Master Courses require an additional fee.

To document CME credit: earned at the Annual Meeting, participants should maintain a list of sessions they attended. Credit is earned on an hour-for-hour basis. A daily attendance log is provided in this book for listing your sessions and credits.

Course Enrollment
Ticket Purchase Is Required For All Courses.
Located in Exhibit Halls C–E, Level 2, Pennsylvania Convention Center. The days and hours of operation are the same as registration. Course tickets not sold in advance will be available on-site at the Course Enrollment Area beginning at 12 noon on Friday. You must be registered for the meeting before you can enroll in courses.

Daily Bulletin
Located in Room 300, Level 3, Pennsylvania Convention Center, the Daily Bulletin accepts written requests from APA members for publicity of component, committee, and allied group events as space allows. Four issues are published. The issue for Saturday/Sunday is printed in advance. Copy for the Monday, Tuesday and Wednesday issues can be dropped off in Room 300 by 12 noon the day before the publication date.

Exhibitor Registration

Scientific Programs Office

Located in Room 307B, Level 3, Pennsylvania Convention Center. The days and hours of operation are as follows: Friday, 12 noon–3:00 p.m.; and Saturday–Wednesday, 7:30 a.m.–5:00 p.m. Come to this office if you have questions about:
1. Scientific sessions listed in the Program Book or Syllabus
2. Adding audiovisual equipment to scientific sessions
3. Scientific program changes
4. Submitting a scientific session for the 2013 Annual Meeting
5. The 2012 Institute on Psychiatric Services

Scientific Session Capacity Guidelines

If overcrowding occurs in a scientific session we ask your assistance so that all in attendance can benefit. Please abide by the following guidelines if you are in a crowded room.
1. Take a seat as close to the front of the room as possible
2. Move to the center of the row and fill all seats, so that chairs are available on the aisles for additional attendees
3. Don’t stand or sit in the aisles or lean against walls. Overcrowding of meeting rooms may subject the session to shut down by the Fire Marshall; therefore, please either find a seat or attend another session

Shuttle Bus Service

You must be a registered attendee or a registered exhibitor to ride on the courtesy shuttle bus. Shuttle bus service will begin on Saturday, at approximately 7:00 a.m., and will operate daily throughout the meeting commensurate with the scientific program schedule and will
conclude on Wednesday, at 5:30 p.m. The Pennsylvania Convention Center will serve as the “hub” for all shuttle bus routes. The Shuttle Bus Desk is located in the Arch Street Concourse, Level 1, Pennsylvania Convention Center. A detailed shuttle bus schedule will be available on site and will be posted in the lobbies of participating hotels.

**Smoking Policy**

There is no smoking allowed anywhere in the Pennsylvania Convention Center.

**Tape Recording and Visual Reproduction Policies**

Audio recording is only permitted for personal use. Attendees are welcome to use their own small, portable devices to record any session except Case Conferences, unless prohibited by the presenters. Larger, professional recorders are not permitted except for use by registered members of the working press in accordance with APA Press Policies. APA has authorized a professional firm to record sessions. Badges of personnel representing this firm will clearly identify them. Attendees are not permitted to photograph (including with cell phone cameras) or video any session because the intrusive nature of the recording may disrupt the session.

The American Psychiatric Association requires disclosure by all program planners and presenters at CME activities of any financial or other affiliation with commercial organization(s) that may have a direct or indirect interest in the subject matter of the educational activity. A “financial interest” may include, but is not limited to: being an employee and/or being a shareholder in the organization; being on retainer with the organization; or having research or honoraria paid by the organization. An “affiliation” may include holding a position on an advisory committee, speakers’ bureau or some other role or benefit to a supporting organization.

In compliance with the ACCME’s Standards for Commercial Support, the APA has a management of conflict (MCI) process for all CME activities. This process ensures that all conflicts of interest are identified, managed and resolved prior to the educational activity. Additionally, the prospective audience must be informed of the presenters’ or program planners’ affiliations with every commercial interest by an acknowledgement in the printed program and verbal or visual disclosure to participants at the session (disclosure by slide or overhead is required if audiovisual equipment is used for the presentation). Disclosing to learners the relevant financial relationships that were present and resolved assists learners in assessing the potential for bias in the information that is presented. The APA also requires verbal disclosure of discussion of unlabeled uses of a commercial product or investigational use of a product not yet approved for this purpose.

The presenters and planners on the following pages indicated that either they or an immediate family member have a financial interest or other affiliation with a commercial entity producing, marketing, re-selling, or distributing health care goods or services consumed by or used on patients; the company name and affiliation is also listed. Providers of clinical service directly to patients are not considered to be commercial interests. The second group of presenters and planners indicated neither they nor an immediate family member has any significant relationship to disclose.

All presenters and planners must complete a disclosure in order to participate in an APA CME activity. This disclosure listing includes the presenters of the Scientific Program and New Research Poster Sessions.

**Advances In Series**

These sessions are intended to highlight important new advances occurring in the field of psychiatry involving selected disorders or treatments. Some of these sessions are chaired by editors of recent textbooks published by the American Psychiatric Publishing, Inc. (APPI), and feature selected chapter authors from these texts. The books discussed at these sessions may be purchased at the APPI bookstore or online. During the Advances in Research Session, leading clinical researchers present the latest developments in research. Other types of advances in sessions include topics designed to provide psychiatrists with the latest in clinical developments in other areas of medicine. The intent is to give the audience an update from a physician in a particular specialty. These sessions will help attendees keep pace with the rapidly expanding knowledge base and technology in various branches of medicine.

**Case Conferences**

During these 90-minute sessions, clinical material is presented by videotape or the treating therapist. One or more experts then discuss the case.

These sessions are open to APA members only. A blue registration badge or an APA membership card is required for admittance.

---

**Courses/Master Courses**

Courses are designed to emphasize learning experiences that actively involve participants and include the opportunity for informal exchange with the faculty. Offered in four-hour (half-day), six-hour (full-day), and eight-hour (full-day) sessions, courses either review basic concepts in a special subject area or present advanced material on a circumscribed topic. Attendees must be registered for the meeting and purchase tickets to attend.

**Focus live!**

These 90-minute sessions allow attendees to test their knowledge using an interactive Audience Response System (ARS), offering a new and entertaining way to learn. By using the ARS, attendees will feel like they are involved in a small group consultation with an expert clinician, even though the session is being attended by a large number of people. Experts, who served as guest editors of FOCUS, will lead lively multiple choice question-based discussions, and the audience will enter their answers using hand-held devices. The results are instantly tallied and projected on the screen.

**Forums**

These are flexible presentations that afford an opportunity to highlight and select topics that are of timely interest to psychiatrists and other mental health professionals.

**International Discussion Groups at the APA 165th Annual Meeting**

*Philadelphia Marriott Downtown, Philadelphia, Pennsylvania*

Join us at the APA international discussion groups. These discussions afford psychiatrists the opportunity to meet and discuss relevant medical and mental health issues pertinent to the world. These groups are open to all Annual Meeting attendees and chaired by APA members.

**Sunday, May 6, 2012**

2:30 – 4:30pm  
**Africa Discussion Group**  
Room 410, Level 4

2:30 – 4:30pm  
**Europe Discussion Group**  
Room 411, Level 4

**Monday, May 7, 2012**

2:00 – 4:00pm  
**South Asia Discussion Group**  
Room 410, Level 4

Those interested in mental health issues in Latin America may wish to attend the American Society of Hispanic Psychiatrists allied organization meeting Saturday, May 5 from 10:00 AM to 8:30 PM at the Loews Philadelphia Hotel, Commonwealth Hall, B,C,D. Further information is available in the Directory of Activities. Cocktail hour at 6:00 PM for ASHP members only.
professionals. Speakers and panel members are chosen by the Scientific Program Committee for their expertise and leadership in the field.

**Lectures**

Lectures feature a small number of distinguished speakers discussing scientific and cultural topics, many of which will extend our understanding beyond the usual limits of clinical psychiatry. The Scientific Program Committee invites the lecturers. Award lectures are selected by the various APA Award Boards and/or Councils. All award lecturers are approved by the Board of Trustees.

**New research**

This format allows for presentation of very recent findings. Posters, which are visual, are self-explanatory presentations. Two poster sessions on Monday will be designated as Young Investigators’ Poster Sessions, which will contain poster presentations from young investigators, residents, medical students, and research or clinical fellows.

**Scientific and clinical reports**

Scientific and Clinical Reports are oral presentations of papers prepared for submission before publication. In this 90-minute format, reports are grouped by topic, with discussion from the audience following the presentation of each paper. There is no formal discussant.

**Seminars**

Seminars are designed to emphasize in-depth learning experiences that actively involve participants and include the opportunity for informal exchange with the presenters. Offered in four-hour (half-day) sessions, seminars either review basic concepts in a special subject area or present advanced material on a circumscribed topic.

**Small interactive sessions**

This 90-minute format allows small groups to meet informally with either selected experts in psychiatry to discuss topics chosen by the expert; to obtain consultations for problems in research from senior researchers; or utilize clinical material offered by the attendee and hear, clinically-based seminars presented by outstanding educators. Small Interactive Sessions are reserved for residents only. These sessions are limited to 50 attendees on a first-come, first-served basis.

**Symposia/Presidential**

Symposia are two or three-hour sessions consisting of four to six presentations that are thematically linked and focus on a specific topic relevant to clinical psychiatry. They are designed to provide comprehensive treatment on a topic or discussion of the topic from several points of view by the participants and stimulate discussion with the audience.

**Workshops (media)**

Workshops are 90-minute sessions, which typically involve brief presentations from individual panel members, followed by the opportunity for lively and informative discussion. This format provides for substantial audience participation and should be highly interactive. **Media Workshops** are three-hour sessions where a feature-length film is shown and discussed.
This form is for your records and not for submission. Use this page to keep track of your attendance. Reporting is on an honor basis, claim one credit for each hour of participation.

All scientific sessions listed in the Annual Meeting Program Book are designated for AMA PRA Category 1 Credits™, except for New Research Poster Sessions.

BIO
Helen S. Mayberg, M.D., is Professor of Psychiatry and Neurology and the Dorothy Fuqua Chair in Psychiatry Imaging and Therapeutics in the School of Medicine at Emory University. Her research program uses neuroimaging to study brain mechanisms mediating depression pathogenesis and antidepressant treatment response. She pioneered the development of deep brain stimulation for treatment-resistant depressed patients. Dr. Mayberg is a Board Certified Neurologist, is a member of the Institute of Medicine of the National Academies, the Dana Alliance, and the NARSAD Scientific Advisory Board; is active in the Society for Neuroscience, Society of Biological Psychiatry, American Neurological Association, American College of Neuropsychopharmacology, and the Organization for Human Brain Mapping; and serves on the editorial boards of Human Brain Mapping, Biological Psychiatry, Neuroimaging, Brain Stimulation, Neuroinformatics, and Brain Structure and Function. Carol Tamminga, M.D., is Professor and Chair of the Department of Psychiatry, and Chief of Translational Neuroscience Research in Schizophrenia at the University of Texas Southwestern Medical School. She holds the Communities Foundation of Texas Chair in Brain Science, the Lou and Ellen McGinley Distinguished Chair, and the McKenzie Chair in Psychiatry. She directs research on understanding the disease mechanisms of schizophrenia and on developing improved treatments. At the University of Texas she developed a clinical research laboratory, a human postmortem brain collection, and an in vivo human imaging laboratory for normal and schizophrenia research. Dr. Tamminga serves on several boards, is a member of the NIMH National Advisory Council and is a member of the Institute of Medicine of the National Academies. She cofounded and directs the International Congress on Schizophrenia Research, and lectures nationally and internationally on treatments in schizophrenia.

Bankole Johnson, M.D., Ph.D., D.Sc., is Alumni Professor and Chair of the Department of Psychiatry and Neurobehavioral Sciences at the University of Virginia and is Professor in the Departments of Neuroscience and Medicine. Dr. Johnson’s clinical expertise is in addiction and biological and forensic psychiatry. He uses neuroimaging, neuropsychology, and molecular genetics techniques in his research of the psychopharmacology of medications for treating addictions. His many honors include the Distinguished Senior Scholar of Distinction Award from the National Medical Association and the American Psychiatric Association’s Distinguished Psychiatrist Lecturer Award. He is a Fellow in the Royal College of Psychiatrists, the American College of Neuropsychopharmacology, and Distinguished Fellow of the American Psychiatric Association.

**BIO**

Judge Steven Leifman is at the forefront of a public policy movement to reduce the number of people with mental illness in prison, and to develop alternatives that offer treatment and support recovery. He serves as Associate Administrative Judge in the Miami-Dade County Court Criminal Division and as Special Advisor on Criminal Justice and Mental Health for the Supreme Court of Florida. He Chairs the Eleventh Judicial Circuit of Florida’s Mental Health Committee, Cochaired the Miami-Dade County Mayor’s Mental Health Task Force, and serves on a statewide task force to improve Florida’s mental health system. He has over two dozen awards and honors, is a member of the National Leadership Forum for Behavioral Health, and is on the Board of Directors of the American Psychiatric Foundation. He has developed a course explaining how judges can divert defendants with mental illness into treatment rather than jail.

Sir Michael Rutter, M.D., is Professor of Developmental Psychopathology at the Institute of Psychiatry, Kings College. He is a long-time Consultant at the Maudsley Hospital. He has studied the genetics of autism as well as the development of diagnostic and screening measures for autism, antisocial behavior, and school and family influences on children’s behavior. He has a special interest in the interplay between genetic and psychosocial risk factors. Dr. Rutter led a major study into the effect of early severe deprivation on Romanian orphans adopted into Britain. He was Deputy Chairman of the Wellcome Trust from 1999 to 2004, a Fellow of the Royal Society, and a Founding Fellow of the Academia Europaea and the Academy of Medical Sciences.

Milton Kramer, M.D., is Consultant in Psychiatry at Beth Israel Medical Center and St. Luke’s-Roosevelt Hospital. He was formerly director of psychiatric research at Maimonides Medical Center and Clinical Professor of Psychiatry at New York University. While at the University of Mississippi he was Director of the country’s first Division of Somnology and later opened the sleep and dream laboratory at the VA hospital in Cincinnati. Dr. Kramer was a founding member of what is now the Academy of Sleep Medicine. His lifetime of research in sleep and dreams has been recognized by the International Association for the Study of Dreams of which he is Past President. Dr. Kramer is well-known for his writings about dreams and the diagnosis and treatment of sleep disorders.

Cognitive Therapy and Psychodynamic Therapy: More Alike Than Different?
A Conversation Between Aaron T. Beck, M.D. and Glen O. Gabbard, M.D.

Moderated by John M. Oldham, M.D., M.S.

Published research on psychotherapy has increasingly demonstrated its effectiveness as an evidence-based treatment for many psychiatric disorders, in categories ranging from mood and anxiety disorders to personality disorders. But psychotherapy, even “manualized,” standardized psychotherapy, comes in many varieties. Not uncommonly, adherents to one form of psychotherapy or another advocate for its unique effectiveness, as if the field is a racetrack where there is only one winner. In this spirit, the most frequent “either/or” comparison is between cognitive therapy and psychodynamic therapy, often viewed as radically different treatment approaches.

A rare opportunity will be presented in a unique Opening Session event at the Annual Meeting of the American Psychiatric Association in May, 2012, in which two masters of psychotherapy will discuss the commonalities and differences between these two well-established forms of treatment. Without powerpoints and without scripts, Drs. Aaron Beck and Glen Gabbard will take their seats for an informal armchair conversation about these different yet overlapping forms of psychotherapy.

Aaron T. Beck, M.D.
University Professor Emeritus of Psychiatry, University of Pennsylvania, Perelman School of Medicine

Glen O. Gabbard, M.D.
Professor of Psychiatry at SUNY Upstate Medical University in Syracuse, NY, and Clinical Professor of Psychiatry at Baylor College of Medicine in Houston, TX

John M. Oldham, M.D., M.S.
Senior Vice President and Chief of Staff, The Menninger Clinic; Professor and Executive Vice Chair, Menninger Department of Psychiatry and Behavioral Sciences, Baylor College of Medicine; and President, American Psychiatric Association

APA Guest Lecture Series

Speaker:
Kay Redfield Jamison, Ph.D.

Chair:
Michael F. Myers, M.D.

BIOS

Kay Redfield Jamison, Ph.D., is the Dalio Family Professor in Mood Disorders, Professor of Psychiatry at the Johns Hopkins University School of Medicine, and Co-director of the Johns Hopkins Mood Disorders Center. She is a coauthor of Manic Depressive Illness: Bipolar Disorders and Recurrent Depression, the definitive book on the topic. Dr. Jamison is one of the country's most famous writers about manic-depressive illness. Her memoir about her experiences with manic-depressive illness, An Unquiet Mind, was on The New York Times Best Seller List for over 5 months and translated into twenty-five languages. Her other books have won widespread acclaim, including her most recent, Nothing Was the Same. In addition to many professional honors, she was selected as one of five individuals for the public television series "Great Minds of Medicine," and chosen by Time magazine as a "Hero of Medicine."

Eric R. Kandel, M.D., is Professor at Columbia University; Fred Kavli Professor and Director, Kavli Institute for Brain Science; and a Senior Investigator at the Howard Hughes Medical Institute. Dr. Kandel's research focuses on biophysics/ion channels, synapses and circuits, neurobiology of learning and memory, models of psychiatric disorders, and neurogenetics. He specializes in molecular biology of long-term memory storage. His research theme combines behavioral, cellular, and molecular biological approaches to delineate the changes that underlie simple forms of learning and memory. Dr. Kandel has received 13 honorary degrees, is a member of the National Academy of Sciences as well as the National Science Academies of German and France. In addition to multiple international awards, he received the US National Medal of Science. In 2000 he was awarded the Nobel Prize for Physiology or Medicine.

Edward M. Kennedy, Jr.

Mr. Kennedy is the president and co-founder of Marwood Group & Co., a healthcare-focused financial services firm with offices in New York City, Washington, D.C., and London specializing in proprietary healthcare research, asset management and private equity advisory services. Previously, Mr. Kennedy served as an Associate and later as Counsel to the law firm of Wiggin & Dana located in New Haven, CT. Mr. Kennedy’s health law practice focused primarily on state and federal regulatory and reimbursement issues affecting hospitals, homecare agencies, long-term care providers, physicians, and mental health providers. In addition, Mr. Kennedy served as Director of Legal and Regulatory Affairs at the Connecticut Hospital Association, counseling acute care providers and policy-makers on a wide variety of emerging health care issues.

Mr. Kennedy has also been an active leader in the civil rights movement for persons with disabilities. In his disability law practice, he advised companies about how to best expand opportunities for persons with disabilities and how to avoid liability under the Americans with Disabilities Act. He continues to serve on the corporate and advisory boards of numerous disability organizations and lectures nationwide on topics relating to health and disability law. Mr. Kennedy received an undergraduate degree from Wesleyan University, a master's degree from Yale University’s School of Forestry and Environmental Studies, and a law degree from the University of Connecticut School of Law.

165th Annual Meeting

**Value-Based Mental Health Care Delivery**

**Speaker:**
Michael E. Porter, M.B.A., Ph.D., is Bishop William Lawrence University Professor at Harvard Business School. An authority on company strategy and the competitiveness of nations and regions, his work is widely recognized by governments, corporations, nonprofits, and academic institutions across the globe. His work has redefined thinking about competitiveness, economic development, economically distressed urban communities, environmental policy, and the role of corporations in society. Dr. Porter studies problems in health care, and his book, *Redefining Health Care*, develops a new framework for transforming the value delivered by the health care system, with implications for providers, health plans, employers, and government. He has also developed a curriculum for universities, medical schools, and professional education programs for health professionals around the world. Dr. Porter has advised numerous leading US and international companies and plays an active role in US economic policy with the Executive Branch and Congress.

**APA Guest Lecture Series**
**Lecture 24:** 11:00 - 12:30 p.m.

**APA NIMH Vestermark Award Lecture**
**Lecture 23:** 11:00 - 12:30 p.m.

**Bios**

**Bryce Templeton, M.D., M.Ed.** is Professor Emeritus at Drexel University. Dr. Templeton has extensive experience developing new methodologies for the evaluation of knowledge, skills, problem solving ability and competencies of students, residents, and practicing physicians. His career includes 16 years at the National Board of Medical Examiners, where he helped organize both the NBME Part II exam and several special board exams. Earlier in his career he worked for the Public Health Service at a federal prison in California and on the consultation service at the University of Pittsburgh. He was recently awarded The Vestermark Psychiatry Educator Award, the top national award for excellence, leadership, and creativity in education from the American Psychiatric Association and the National Institute of Mental Health.

John H. Krystal, M.D., is the Robert L. McNeil, Jr., Professor of Translational Research and Chair of the Department of Psychiatry at the Yale University School of Medicine; Chief of Psychiatry at Yale-New Haven Hospital; and Director of the NIAAA Center for the Translational Neuroscience of Alcoholism. He is also Codirector of the Alcohol Research Center and the Neuroscience Division of the National Center for PTSD of the Department of Veterans Affairs. Dr. Krystal is a pioneer of the translational neuroscience of alcoholism. His work combines experimental and clinical psychopharmacology, molecular and cognitive neuroimaging, and molecular genetics in studies of mechanisms underlying human alcohol intoxication and dependence, the human neurobiology of the heritable risk for alcoholism, and the treatment of alcohol dependence. He and his collaborators are known for their groundbreaking studies of the blockade of the NMDA glutamate receptor and the facilitation of GABA-A receptor function. Dr. Krystal co-led the first multicenter trial that rigorously tested the efficacy of naltrexone for alcohol dependence. He is a member of the NIAAA National Alcohol Advisory Council and is a member of the Institute of Medicine of the National Academies.

Neal Swerdlow, M.D., is Professor of Psychiatry at the University of California San Diego School of Medicine; Director of the UCSD Psychiatry Research Residency Track; and Deputy Director of the NIMH Consortium on the Genetics of Schizophrenia. His laboratories conduct human and animal studies focused on the neural circuit and molecular regulation of information processing and its deficiencies in specific brain disorders, including schizophrenia, Tourette Syndrome, and obsessive compulsive disorder. He developed a model for preclinical antipsychotic screening that remains the gold standard across industry and the FDA. He has chaired the Medical Advisory Boards of the Tourette Syndrome Association and NAMI, and is a recipient of the ACNP Joel Elkes Award, APA Kempf Award, and NAMI Judith Silver Award.
